EXPERIENCE

CADENCEIQ | Co-founder & Software Engineer
June 2020 – Present | Remote
- As a co-founder of the company, worked on shaping the product idea, technologies used and business plans.
- Leading development for the sales engagement platform.
- Developed REST and Graphql APIs using Node and Express JS.
- Integrated with CRMs like Pipedrive and Hubspot using their REST APIs.
- Integrated IBM Watson's Tonality and Personality API to understand best performing tones for emails and for other analytics of the application.
- Technologies Used: Nodejs, Express, React, REST API, GraphQL, Nylas API(for emails), Google Cloud Platform, IBM Watson APIs

FREELANCE SOFTWARE DEVELOPER
March 2019 – April 2020 | Remote
- Developed web and mobile applications for multiple small and medium business clients using technologies like HTML, CSS, PHP, JAVASCRIPT, Node JS, FIREBASE, MYSQL, and FLUTTER.
- Worked on projects like attendance management system, Video on Demand application, Document Storage platform, local service provider marketplace/ lead generation platform etc.

PROJECTS

HTTP / GRPC API BUILDER | Go, React JS, gRPC, PostgreSQL
October 2020 | egnite.dev(project website)
- Api builder/ service code generator that takes in a model/schema definition through UI or YAML and generates code for HTTP/REST and gRPC APIs in Go.
- Built to support multiple authentication mechanisms for connecting securely with the generated apis.
- It also generates sql file, DockerFile and Kubernetes yaml files for easy deployment of the generated service.
- Technologies Used: Go, React, gRPC, Protocol Buffers, Docker, Kubernetes, PostgreSQL, Yaml

VIDEO STREAMING APP | Dart, Flutter, Firebase, Razorpay
December 2019 | Github Repository
- Video on demand subscription platform which allows users to watch videos after taking subscription of the service.
- Used firebase as the backend for the app built using flutter.
- Used Razorpay as the payment gateway for processing payments.
- Added firebase analytics for tracking user activity.

EDUCATION

INDIAN INSTITUTE OF TECHNOLOGY MADRAS
Bachelor Degree in Data Science
September 2020 - Present

SKILLS

Languages:
C/C++, Go, Dart, Javascript, Typescript

Frameworks:
React.js/Redux, Node.js/Express, Flutter

Databases:
PostgreSQL, MYSQL, MongoDB, Firestore

Technologies:
gRPC, REST API, GraphQL, Git/Github, Docker, Kubernetes, Firebase, Message Queues , Pub/Sub, Redis

Tools:
VS Code, IntelliJ Idea, Android Studio, Adobe XD, Figma

STRENGTHS

1. Good Communication skills
2. Committed to lifelong learning
3. Consistent and Reliable
4. Good Team Skills

CERTIFICATIONS

2020 Responsive Web Design
2020 Javascript DS and Algorithms

OTHER PROJECTS

Hotel Booking App UI (Flutter)
